

The Moment We Are In

Africa stands at an inflection point in AI.

The landscape is evolving rapidly. Africa has the resources, talent, and market need. What's required now is the infrastructure to turn that potential into scale.

Who We Are

We are a G7-endorsed initiative co-led by the Ministry of Enterprises and Made in Italy (MIMIT) and UNDP. Aligned with the Mattei Plan for Africa, we are a partnerships engine that brings together African and G7 actors to build and diffuse AI in practical, inclusive, and sustainable ways.

About The Cyber4Africa Programme

A 6-month cybersecurity resilience programme for African AI startups - embedding security into the development lifecycle. Key features:

01 Cyber Resilience & Awareness

02 Training & Capacity Building

03 Technical & Operational Support

PRIORITY SECTORS

HealthTech

Fintech

GovTech

Energy & Climate

AI Infrastructure

A Trust Layer for Africa's AI Stack

As African AI ecosystems grow, cybersecurity will be foundational for building trust, adoption and long-term viability

The Opportunity for Diffusion

As African AI scales, resilience and internal capability will determine whether its systems can be trusted

Foundations for tomorrow. Resources for today.

Join us in building Africa's AI future on Africa's terms.
